You are about to attend a ‘fermented food’ seminar where you will be giving a presentation on a particular type of cheese. In preparation for this, you need to:

1. Select a particular type of cheese.

2. Write a brief description of the cheese.

3. How is the cheese made?

4. If possible, find the name of the bacteria used in the cheese.

5. Select one of the following:
   i. Bring in a sample of your cheese for the ‘Cheesefest’
      or
   ii. Write a five paragraph essay on the history of cheesemaking.
